Foreword

FOR the past ten years I have been engaged in growing Ground-Cover Plants in large quantities for use by Landscape Architects, and others, whose plantings require plants of this character in quantity.

As the areas to be covered are usually large, it is essential that I sell these plants as reasonably as possible and still furnish a satisfactory plant for the purpose.

By economical methods of propagation and by selling the plants as small field plants or directly from 2¼-inch pots, in which they are allowed to grow and remain until fully pot bound, instead of reshipping into 3½ or 4-inch pots, the expense of reshipping is eliminated, no excess soil is shipped, packing charges are lessened, and plants ship more safely and are better and more quickly planted.

Also and more important than all is the proven fact that Ground-Cover Plants should be planted closely for permanent and immediate effect.

With larger plants widely spaced each plant must grow a great deal to completely cover the space between plants, while the smaller plants closely spaced have each to grow but little before a solid carpet is formed, which excludes the sun from their root system, conserves moisture, and eliminates weeds. Such plantings continue to flourish for years with occasional mulching and moderate care.

To my prospective new customers I would say that I sell yearly hundreds of thousands of plants to Landscape Architects and Nurserymen. These continued and increased sales must prove the merits of my system of growing and planting.

My stock is of uniform grade or it will not be shipped. Packing is properly and promptly done. Prices are F. O. B. Narberth, Pa., on the Main Line of the Pennsylvania Railroad. **TERMS ARE NET CASH, NO CHARGE MADE FOR PACKING. SATISFACTORY REFERENCES MUST BE GIVEN FROM UNKNOWN CUSTOMERS.**

HUGH B. BARCLAY,
NARBERTH, PA.

PLANTING DIRECTIONS

HEAVY SOILS

Few plants enjoy heavy soil even if rich, and for such soils I advise the addition of 2 inches of sand and 2 inches of Peat Moss, dug into the soil not more than 4 to 6 inches deep. If soil is rich no manure need be added. Plant firmly.

MEDIUM SOILS

Addition of 1 inch of sand and 2 inches of Granulated Peat Moss, or fine compost, dug 4 to 6 inches deep (not deeper). No manure unless soil is poor. Plant firmly.

LIGHT SOILS

Addition of 2 inches of Granulated Peat Moss or Leaf Mould or Compost, Peat Moss preferred. Add manure if soil is poor, but do not dig such under more than 6 inches, except for Euonymus or similar deep-rooted plants. Plant firmly.

VERY POOR LIGHT SOIL

Add manure and Peat Moss (or Compost), 2 inches of each. Dip in deeper, about 8 inches, level and add 1 inch more Peat Moss. Dig lightly and plant firmly.

HARD GROUND

The soil about many new homes where grading has been done will be found to be extremely hard from the presence of clay sub-soil with the top soil. Such soil should be first broken up well by deep digging. Two inches of sand and 2 inches of Peat Moss or manure added, again turned and well broken up, and then another inch each of sand and Peat Moss added and dug in 4 or 6 inches deep. Plant firmly.

UNDER TREES

The soil under large trees is invariably poor, and contains little humus. Bearing in mind that ANY PLANT planted under a tree has keen competition, any added attention to the preparation of the soil is good advice. I advise first the digging of the soil to be planted to a depth of 6 to 8 inches. Add 3 inches of manure and 2 inches of Peat Moss or Compost, and sand if the soil is very heavy. Dig well again, add another inch of Compost or Peat Moss, and dig lightly in. Plant firmly.

MULCHING

A light mulch, one-half to 1 inch of Granulated Peat Moss, Buckwheat Hulls, or fine Compost, is beneficial to any planting and where possible should be given after planting.

Ajuga reptans (Bugle)

Nearly evergreen plant with rather heavy foliage, and blue flowers. Hardy and suitable for garden positions and rockeries, and does very well as a ground-cover in partial shade.

PRICES

| Size | Distance to Plant Inches | Per Each | Per 100 | Per 1000 |
|--------------------------|-----------------------------|----------|---------|----------|
| Small Field Plants | 8-10 | \$0.10 | \$8.00 | \$60.00 |
| 2¼-inch Pot Plants | 10-12 | .15 | 10.00 | 85.00 |

10 at the 100 Rate, 250 at the 1000 Rate

Ajuga genevensis

A most excellent cover plant in semi-shade, not entirely evergreen, but nearly so; clear blue flowers in June.

PRICES

| Size | Per Each | Per 100 | Per 1000 |
|--------------------------|----------|---------|----------|
| Small Field Plants | \$0.10 | \$8.00 | \$60.00 |
| 2¼-inch Pot Plants | .15 | 10.00 | 85.00 |

10 at the 100 Rate, 250 at the 1000 Rate

Buxus suffruticosa (Dwarf Box)

I grow considerable Dwarf Box for Edging. Stock is excellent. Heavy and of even grade.

PRICES

| Size | Per Each | Per 100 | Per 1000 |
|-----------------------------------|----------|---------|----------|
| Field Plants 4-6 in. | \$0.25 | \$22.00 | \$200.00 |
| Field Plants 6-8 in., Heavy | .40 | 30.00 | 275.00 |

10 at the 100 Rate, 250 at the 1000 Rate

Buxus sempervirens

The quicker growing Boxwood. Not suited for small borders, but used for larger hedges, etc. My stock is excellent.

PRICES

| Size | Per 100 | Per 1000 |
|----------------------------|---------|----------|
| Field Plants 8-10 in. | \$35.00 | \$275.00 |

10 at the 100 Rate, 250 at the 1000 Rate

Berberis veruculosa

Dwarf spreading Barberry with foliage resembling the Holly, turning bronze in winter. Suitable for Rockery, Low Walls, Borders, in place of Berberis Thunbergi. A beautiful thing, not entirely hardy North.

PRICES

| Size | Per Each | Per 100 |
|----------------------------|----------|----------|
| Field Plants 8-12 in. | \$1.50 | \$125.00 |

10 at the 100 Rate

Cotoneaster horizontalis

No better or more beautiful plant known for Terraces, Slopes, Tops of low walls, Foundation planting, etc. Fan shaped, prostrate branches, and red berries in Fall.

Field grown stock does not transplant safely, so I offer only excellent stock from 3½-inch and 6-inch pots.

PRICES

| Size | | Distance to Plant Inches | Per Each | Per 100 | Per 1000 |
|--|-------|--------------------------------|----------|---------|----------|
| 3-inch Pots | | 18-24 | \$0.75 | \$50.00 | \$400.00 |
| 6-inch Pots | | 24-36 | 1.25 | 100.00 | |
| 10 at the 100 Rate, 250 at the 1000 Rate | | | | | |

Crataegus pyracantha lelandi (Fire Thorn)

A low-growing thorny bush, covered in Fall with gorgeous scarlet berries. Suited for planting against low walls, among evergreens and shrubbery.

PRICES

| Size | | Per Each | Per 100 |
|--------------------|----------------|----------|----------|
| Field Grown Plants | 12-18 in. | \$1.50 | \$125.00 |
| 10 at the 100 Rate | | | |

Euonymus radicans

A small leaved evergreen vine, clinging climber, very suitable for low walls, stone or brick houses, slopes and terraces, as an edging plant for gardens, in place of boxwood, among shrubs and evergreens, and for vases and window-boxes.

Euonymus is perfectly hardy, will stand some shade, and is altogether a plant too little used.

PRICES

| Size | Distance to Plant Inches | Per Each | Per 100 | Per 1000 |
|--|--------------------------------|----------|---------|----------|
| One-Year | 10-12 | \$0.10 | \$8.00 | \$50.00 |
| Two-Year | 12-18 | .25 | 12.00 | 100.00 |
| Three-Year | 18-24 | .40 | 20.00 | 175.00 |
| 10 at the 100 Rate, 250 at the 1000 Rate | | | | |
| Special Prices in Over 1000 Lots | | | | |

Euonymus radicans variegata

A variegated green and white form of Euonymus radicans, and extremely beautiful for contrasts. Suitable for every purpose that suits the above and as hardy.

PRICES

Prices and sizes are the same as Euonymus radicans.

Euonymus Kewensis

Perhaps the best evergreen ground-cover plant for a myriad of uses about a home, except in dense shade or where some height is desired. Forms a perfect mat of small leaved green, resembling *Mitchella repens*, foliage turns bronze red in cold weather, will cling and climb to a height of two feet or more if desired. Most excellent for low walls, rockeries, areaway copings, low slopes and terraces, edges of pools, etc. Scarcity of stock has kept the price high, however. I now have about 200,000 plants to offer, and have priced it so you can use it.

PRICES

| Size | Distance to Plant Inches | Per Each | Per 100 | Per 1000 |
|--|--------------------------------|----------|---------|----------|
| Two-Year Field | 12-18 | \$0.20 | \$10.00 | \$85.00 |
| 2¼-inch Pots | 12-18 | .20 | 10.00 | 85.00 |
| 10 at the 100 Rate, 250 at the 1000 Rate | | | | |
| Special Prices in Over 1000 Lots | | | | |

Euonymus vegetus (Evergreen Bittersweet)

Climbing or semi-prostrate evergreen vine, covered in Fall and Winter with red berries similar to Bittersweet. Rather a slow grower, but when established makes one of the most beautiful vines possible. Splendid for low walls, terraces, slopes, and planted on top of embankment walls.

PRICES

| Size | Distance to Plant Inches | Per Each | Per 100 | Per 1000 |
|--|--------------------------------|----------|---------|----------|
| One-Year | 18-24 | \$0.25 | \$18.00 | \$150.00 |
| Two-Year | 24-36 | .50 | 30.00 | 200.00 |
| Three-Year | 36-48 | .75 | 40.00 | |
| 10 at the 100 Rate, 250 at the 1000 Rate | | | | |

Euonymus Carrerrii

Similar to the above but a more upright grower and has no berries. Used at entrance gate posts and similar positions. Hardy and highly desirable.

PRICES

Prices and sizes are the same as for *Euonymus vegetus*.

Euonymus radicans acutus

Similar to the type, but more pointed leaves, lighter in color. A rapid grower and evidently the best *Euonymus* yet for steep banks as it is a very prostrate grower, showing no inclination to climb, roots at every place it touches soil and would be excellent to hold banks. Turns bronze-red in cold weather.

| Size | Distance to Plant Inches | Per Each | Per 100 | Per 1000 |
|--|--------------------------------|----------|---------|----------|
| Two-Year Field | 24-36 | \$0.50 | \$30.00 | \$200.00 |
| 2¼-inch Pots | 18-24 | .25 | 20.00 | 150.00 |
| 10 at the 100 Rate, 250 at the 1000 Rate | | | | |

Euonymus radicans Colorata

A new Euonymus, similar to acutus, but has larger, rounder leaves, prostrate creeper of rapid growth and excellent for steep banks, etc., turns bronzy red in Winter. This plant and Euonymus acutus are the best evergreen plants I know of for steep banks in sun or partial shade.

PRICES

| Size | Distance to Plant Inches | Per Each | Per 100 | Per 1000 |
|----------------------|-----------------------------|----------|---------|----------|
| One-Year Field | 18-24 | \$0.50 | \$30.00 | \$200.00 |
| Two-Year Field | 24-36 | 1.00 | 50.00 | 350.00 |

10 at the 100 Rate, 250 at the 1000 Rate

Small Leaved English Ivy

I have a large stock of this beautiful Ivy, similar to the large leaved variety, but with small foliage, and much more beautiful for many effects. Not as rapid a grower as the other, but presumed to be more hardy, though it is seldom that the large leaved ivy is injured.

For vases, window boxes, embankments, etc., in sun or partial shade, this Ivy is unusually good.

PRICES

| Size | Distance to Plant Inches | Per Each | Per 100 | Per 1000 |
|--------------------|-----------------------------|----------|---------|----------|
| 2¼-inch Pots | 8-10 | \$0.20 | \$12.00 | \$85.00 |
| 4 -inch Pots | 12-18 | .50 | 45.00 | |

10 at the 100 Rate, 250 at the 1000 Rate

Large Leaved English Ivy (Hedera Helix)

The well-known large leaved evergreen clinging ivy so much used for walls and houses.

The uses for this plant are very numerous and it is seldom used enough anywhere, for it is a beautiful vine, free from insects and disease, and a rapid grower.

As a border for garden beds or to outline walks, etc., and as a ground-cover in all semi-shady places it is excellent and will do well if properly planted.

The secret is to use smaller plants and more of them to quickly cover all the bare soil, rather than long, large plants which must be pinned down and which cannot be clipped as well.

PRICES

| Size | Distance to Plant Inches | Per Each | Per 100 | Per 1000 |
|--------------------|-----------------------------|----------|---------|----------|
| 2¼-inch Pots | 10-12 | \$0.15 | \$8.00 | \$75.00 |
| 4 -inch Pots | 18 | .50 | 35.00 | |

10 at the 100 Rate, 250 at the 1000 Rate

Pachysandra terminalis

The plant of a thousand uses and the best plant for those uses, bar none. Evergreen always. Hardy under all conditions. Disease free. Even height of six inches. Growing in DENSE SHADE OR FULL SUN gladly, under any condition of soil or exposure, and adding 100 per cent. to the appearance of any planting as well as benefiting the planting by shading the soil.

SOME OF ITS MAIN USES ARE:

- Under all evergreen plantings.
- Under all shrub plantings.
- For areaway copings.
- For loggia and enclosed porch uses.
- For winter and summer window boxes.
- For shrub and flower bed borders.
- For bordering walks and drives.
- For steep terraces in sun or shade.
- For city yards it is ideal.
- For cemetery plots.
- For dense shade under any kind of trees.
- To benefit and beautify anywhere.

I advise the use of one-year field, two-year field, or 2 $\frac{1}{4}$ -inch pots, PLANTED CLOSELY in preference to larger pot or field plants widely spaced, as PACHYSANDRA NEEDS THE SHADE OF ITS OWN FOLIAGE TO PROMOTE PROPER GROWTH. Also by close planting the creeping stolons come up to fill the vacant spaces quickly. With larger plants the stolons will not cover the space for several years. Also the root system of large plants is no greater than with small plants grown from cuttings (not divisions, for divisions will make no root system). My plants are grown from cuttings entirely, rooted in sand and transplanted to field for one or more years or grown in 2 $\frac{1}{4}$ -inch pots for TWO YEARS, that they may be pot bound and form stolons before shipping.

All sizes of plants may be safely shipped and planted at any season.

For extensive plantings I recommend one or two-year field size plants, and for midsummer use or smaller plantings the 2 $\frac{1}{4}$ -pot size.

One-year field size should be planted not less than four to the square foot of space. Two-year field and pot plants, three to the square foot. Rooted cuttings will be quoted in lots of 5000 or more. Prepare soil as directed under planting directions given in front pages of catalog.

(Continued on page 12)

Courtesy WM. PITKIN, JR., Landscape Architect

Showing effective use of

PACHYSANDRA TERMINALIS (JAPANESE SPURGE)

The WONDER PLANT for SHADY PLACES

The most generally useful Evergreen Ground-Cover Plant in the World.

Grows to a height of 6-8 inches and forms a thick mat of clean, cool, green foliage. Hardy under all conditions.

10

The one suitable plant for Shady Positions, Plantings, Cemeteries, Window Boxes, etc.

I have over 3½ millions of this plant in faith in its value to you.

Its benefit to aged and undernourished

“The Proof of the Pudding”

The writers of these opinions are all renowned
Landscape Architects and Arborists.

“I am of the opinion that *Pachysandra* is of immense benefit planted as a Ground Cover under old trees, and I know of numerous occasions where it has been so used in the vicinity of Boston.”

“I am strong for the planting of *Pachysandra* and other Ground Covers about the base of old trees.”

“It seems to me that the beneficial effect of *Pachysandra* on many trees would be almost a foregone conclusion.”

“I am of the opinion that *Pachysandra* under trees on the lawn, where it is impossible to maintain good turf, not only prevents erosion, but maintains the moisture and is a decided benefit for both trees and shrubbery.”

“In addition to its attractive appearance we find it a great aid in maintaining certain soil conditions and highly recommend its use in the restoration and preservation of old or under-nourished trees.”

“After applying top soil, peat moss and manure, it is my intention to blanket these areas with *Pachysandra*, which I consider the most effective Ground Cover obtainable.”

“My own experience has been that there is no better way of keeping a soil condition conducive to good root growth than by means of such a Ground Cover.”

“We have been using *Pachysandra* for a number of years and find it a very desirable Ground Cover for use under trees.”

“I am very much in favor of using the Ground Covers wherever possible in place of grass.”

“Briefly I believe that its greatest value is that of continuing or reproducing forest conditions for old trees.”

Lonicera Halliana (Halls Honeysuckle)

The native Honeysuckle we know so well, and which helps much to make Pennsylvania roadsides beautiful to other State visitors, though we do not ourselves appreciate the plant.

For covering fences, steep banks and unsightly places it has no equal, and should be much more freely planted. Perfectly hardy, free from disease, and of rapid growth. It can be cut at will and easily kept within bounds.

10 at the 100 Rate, 250 at the 1000 Rate

Nepeta Mussinii

A comparatively new plant, not evergreen. It has sage green foliage, and is a mass of foamy blue flowers in May. If cut after blooming it blooms as freely in the Fall. Height 1 foot. Perfectly hardy.

A very beautiful and satisfactory plant for mass effect in the garden or border, and splendid for steep banks, etc. Our demand from landscape men is increasing, so it must be good.

Rhododendron and Laurel

I have my own collector who ships for me from Virginia or Pennsylvania.

The very best of plants of any size, properly dug and graded.

I shall be glad to quote you in mixed or straight sizes in car-load lots. Rhododendron maximum, Carolianum and Catabiense.

Rose Max Graf

The very best Rose I have yet seen for clothing steep banks or waste places.

A Hybrid of Rugosa and Wichuriana, it combines the best qualities of both. Nearly evergreen, a very rapid grower; foliage, insect and mildew proof, habit of growth prostrate, flowers are deep pink single resembling the wild rose.

The foliage being larger it does not lie quite as closely to the ground as Wichuriana and this foliage is more crinkled and attractive than Wichuriana.

Its rapid growth will permit of wide planting, three feet apart at least.

At present I can only offer for spring delivery a few thousand of the small size and a few thousand of the larger size.

Wild Thyme

A species of Thyme found growing wild on New England hills, and a most delightful and unusual plant.

Nearly evergreen, creeping, height 2 inches, hardy, prefers full sun, but will grow in partial shade also.

This plant is extremely suitable for paved terraces, rockeries, garden borders, steep banks, and best of all for garden walks, or planted among the grass on the lawn.

The foliage is very fragrant and the plant will allow of being mown with a lawn mower, so it will give you fragrant walks and lawns, delightful to walk upon, without injury to the Thyme.

The flowers are not beautiful, being small and lavender in color, but the fragrance and ease of growing make this a most desirable plant.

10 at the 100 Rate, 250 at the 1000 Rate

Veronica rupestris (Creeping Speedwell)

A prostrate creeping plant with almost evergreen foliage, and myriads of gentian blue flowers in spring.

Height 2 inches. Hardy and a rapid grower, but does not become a weed. Prefers sun or semi-shade.

Excellent for borders of garden beds, steep terraces, paved walks, rockeries, etc.

PRICES

| Size | Distance to Plant | Inches | Per Each | Per 100 | Per 1000 |
|--------------------------|-------------------|--------|----------|---------|----------|
| 2¼-inch Pot Plants | 10-12 | | \$0.15 | \$10.00 | \$85.00 |

Veronica repens

A beautiful creeper forming solid mossy mats of foliage, nearly evergreen, covered in early spring with thousands of light blue or white flowers. Most excellent for paved walks, rockeries and tops of walls. Sun or semi-shade.

PRICES

| | Distance to Plant Inches | Per Each | Per 100 | Per 1000 |
|--------------------|--------------------------------|----------|---------|----------|
| 2½-inch Pots | 8-12 | \$0.15 | \$10.00 | \$85.00 |

10 at the 100 Rate, 250 at the 1000 Rate

Vinca Minor (Periwinkle or Myrtle)

The beautiful old-fashioned plant, sometimes found in old cemeteries, has glossy evergreen foliage and Periwinkle Blue flowers in spring.

I place it next to Pachysandra as a cover plant under trees and shrubs, though it will not grow in as dense shade as Pachysandra.

Beautiful for banks, terraces and foundation plantings, the rockery and many like positions.

The two-year size are grown from divisions the time specified in clay soil and not to be confused with divisions which are generally from old plantings growing in leaf mold and not readily transplantable.

The 2¼-inch pot plants are heavy and have been clipped to thicken them up and are well pot bound to ship well.

PRICES

| | Distance to Plant | Per Each | Per 100 | Per 1000 |
|--------------------------|----------------------|----------|---------|----------|
| Two-Year Field Size | 3 to sq. ft. | \$0.15 | \$8.00 | \$65.00 |
| 2¼-inch Pot Plants | 3 to sq. ft. | .25 | 10.00 | 85.00 |

10 at the 100 Rate, 250 at the 1000 Rate

Special Prices on Lots of Over 1000

I can supply any quantity, any time.

Wisteria Chinensis

A vine very well known but not used often for its best purpose, that of covering steep banks and low walls. Such uses of this plant are beautiful and make the waste places a decided joy. Purple or lavender flowers. Rapid grower. Perfectly hardy.

PRICES

| Size | Distance to Plant | Per Each | Per Doz. | Per 100 |
|-------------------|----------------------|----------|----------|---------|
| 6-inch Pots | 3-4 ft. | \$1.00 | \$10.00 | \$90.00 |

50 of Any Size Sold at the 100 Rate

English Hurdle Fence

I sell yearly a great deal of this most satisfactory and pleasing Fence. Made, under my supervision, of seasoned split chestnut (not sawed chestnut) of heavier construction than usual, this Fence is both serviceable and attractive for the small or large estate.

The Five Bar height makes a fence 4 feet high when set, and is extensively used for stock fences, paddocks, etc., for sheep, cattle or horses, and for enclosing extensive grounds.

The Four Bar Fence (same spacing of bars, but a foot lower than the Five Bar) makes a Fence most ideal for the Garden or small estate. Rustic and stable in appearance, easily erected and permanent, being of heavy careful construction, with end posts creosoted to withstand decay.

The cost of this fencing is moderate too, but very little more than a Privet Hedge, and as it requires no care, much cheaper in the end.

Ideal for Roses, Grapes, etc., and best of all, does not rob the Garden of needed nourishment as does a hedge.

Panels of both heights are 8 feet 3 inches long, 12 Panels making 100 feet of Fence.

PRICES

- 5 Bar Height, F. O. B. this point \$0.50 per foot
- 4 Bar Height, F. O. B. this point45 per foot

Approximate freight cost in car lots 5 cents per foot. About 150 panels or 1200 feet in a car.

Either height will be completely erected locally for 5 cents per foot.

Gates with irons can be furnished as follows:

- 4-foot Gates \$5.00 each
- 8-foot Gates 10.00 each

English Hurdle Fence (*Continued*)

These Gates are of heavy construction with round end posts. An 8-foot Gate made from a regular panel of Fence, with irons, may be had for \$5.00 each.

This Fence should not be confused with more moderately priced Fence made of sawed timber. Our Fence is made of split timber.

Post and Rail Fence

Heavy Post and Rail Fence in car lots holding approximately 2000 feet of fence can also be supplied.

| | |
|--------------|-----------------|
| 4 Rail | \$0.40 per foot |
| 3 Rail | .30 per foot |

These prices F.O.B. shipping point. Approximate freight
5 cents per foot of complete fence.

“Melrosine”

I catalog this Insecticide because I am the ORIGINATOR of it, and know it to be all that is claimed for it.

Without doubt it is the best remedy for rose bugs yet devised, and if used as directed will positively rid gardens of this pest.

It is also rapidly becoming the best general all-around insecticide, for it kills other insects as readily as rose bugs, INCLUDING THE JAPANESE BEETLE.

Melrosine is NON-Poisonous and pleasant and harmless to use, except to insects. It does not discolor or burn flowers or foliage, and can be used readily for all house and garden plants.
It is used diluted with twenty or more parts of water.

PRICES

| | |
|----------------|--------|
| ½ Pint | \$0.50 |
| 1 Pint | 1.00 |
| 1 Quart | 1.75 |
| ½ Gallon | 3.25 |
| 1 Gallon | 6.00 |

Portable Kennel Fence

Made to fill a long-known want for a reasonably priced quickly erected Kennel.

Made in panels 8' 3" long of heavy Split Chestnut Posts and Rails covered with No. 15 gauge 2-inch mesh wire.

Each panel complete in itself. Ready to erect.

Height of Fence when set is 5 feet.

The popular size Kennel consists of 7 panels of 8' 3" fence, a 4 ft. gate and 4 ft. panel forming a square run nearly 17x 17 feet.

Most attractive, as wire is scarcely noticeable, strong and durable.

| | |
|---------------------------------------|--------|
| Price per Panel | \$6.00 |
| 7 Panels, Gate and 4-foot Panel | 48.00 |
